

Postdoctoral Research Opportunities in NIST's Chemical Science and Technology Laboratory

Challenging Opportunities Include:

- Cellular Systems Science
- DNA Science
- Applied Genetics
- Biomolecular Structure/Function
- Bioanalytical Methods
- Thermometry
- Fluid Metrology
- Chemical Metrology
- Gas Metrology
- Nuclear Analytical Chemistry
- Marine/Environmental
- Chemical Data/Modeling
- Process Sensing
- Optical Metrology
- Pressure/Vacuum
- Bioprocess Measurements
- Microanalysis
- Surface/Interface
- Analytical Microscopy
- Thermodynamics
- Cryogenics
- Property/Modeling of Fluids
- Computational Chemistry

➤ **Located in Boulder, CO; Gaithersburg, MD; Charleston, SC**

➤ **Two-year appointment at \$60K/year**
